

Project

■ Outcomes

- 2.1 Monitor and analyze WiFi traffic
- 2.2 Create a managed WiFi network

■ Summary

For your project you will create a ten minute video presentation based on a paper from the [Mininet-WiFi Use Case Catalog](#) . Your video should cover the topics addressed by the paper *and* include a Mininet-WiFi demo on the topic. It may be helpful to look for papers where the source code is listed in the spreadsheet. You may need to use [NJIT's library access](#) to read full PDFS of the journal articles.

■ Rubric

Topic	Description	Points
Subject Knowledge	The presentation clearly demonstrates an understanding of the topics covered in the paper	10
Demonstration	The presentation utilizes a Mininet-WiFi demonstration to more clearly explain a topic from the paper	10
Organization	The presentation is between 8 and 12 minutes with a suitable flow and pacing	10
Citations	The presentation cites its sources, including the paper being referenced	5
